TOKO MIGINEISHVILI

FULL-STACK WEB DEVELOPER | DEVOPS & IT INFRASTRUCTURE

Georgia • +995 568 277 575 • github.com/Toko122

PROFESSIONAL PROFILE

Full-Stack Developer with 2+ years of hands-on experience delivering web applications across frontend, backend, databases and production infrastructure. Experienced with Next.js, React, TypeScript, Node.js and PostgreSQL, including payment integrations, authentication, real-time features and Linux-based deployments. Responsible, hardworking and proactive, with a practical problem-solving mindset, strong ownership of tasks and a commitment to continuous learning.

CORE TECHNICAL SKILLS

Frontend: Next.js (App Router), React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, shadcn/ui, Radix UI

Backend: Node.js, Express.js, REST APIs, JWT / cookie authentication, Auth.js, Socket.IO, Server-Sent Events, Zod

Data: PostgreSQL, SQL, MongoDB, Redis caching, CSV data processing

Infrastructure: Linux (Ubuntu), Nginx, SSH, PM2, VPS deployment, DigitalOcean, Vercel, Git, GitHub

Integrations: Flitt payments, SendGrid, Cloudinary, Google OAuth

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer | Freelance & Client / Startup Projects

2+ years of practical project experience

- Develop web applications end to end, from responsive interfaces and API development to database integration and production deployment.
- Implement role-based access, authentication, payments and real-time functionality across client and product projects.
- Configure and troubleshoot Linux VPS environments with Nginx, PM2 and SSH; investigate production and application-level issues.

SELECTED PROJECTS

TransAuto | Client web application

Next.js · TypeScript · PostgreSQL · SSE · SendGrid · Flitt

- Built admin and client-facing features, refreshed the interface and established consistent UI patterns.
- Integrated Flitt payment processing with HMAC verification and payment-state handling; implemented live admin alerts using Server-Sent Events.
- Added transactional email notifications and imported large EU customs CSV datasets into PostgreSQL using SSH and psql.

Digit | Freelance marketplace startup (in development)

Next.js · TypeScript · PostgreSQL · Redis · JWT

- Developing a multi-role marketplace with dedicated admin, business, manager and worker dashboards.
- Implemented worker profiles covering skills, experience and education, backed by PostgreSQL and Redis caching.

Cyber Academy | Website development

Next.js · TypeScript · Tailwind CSS

- Designed and developed a responsive website from scratch, emphasizing clear navigation, visual consistency and usability across devices.

Additional projects

NCTS: customs transit management frontend. **FlatFinder:** full-stack app with Google OAuth, PostgreSQL and React Context. **QuizApp:** full-stack quiz application.

ADDITIONAL EXPERTISE & PROFESSIONAL DEVELOPMENT

Hands-on IT troubleshooting: operating system setup, hardware/software diagnostics, basic networking and connectivity support. Currently expanding knowledge in Docker, CI/CD, cloud infrastructure, system design and cybersecurity (learning interests, not claimed production expertise).
